Create only one section with questions. All questions are weighted equally.

Every possible score must be covered by an Overall Score rule such as "Greater Than [highest failing score]" and "Less Than [lowest passing score]" to trigger both a pass and fail status.

Example:

For a quiz with 10 questions, where you want an 80% (8/10) to pass, there must be two rules on the Overall Score tab:

1. Scoring Rule: Greater than | Value 1: 7 | Grade: high
 2. Scoring Rule: Less than | Value 1: 8 | Grade: low
